

LIGHT AND MUSIC SHOW „HEART“

Turgaus str. (from Theater Square to crossroad of Turgaus and Tiltų streets)

The 200-meter-long openwork tunnel of arches, the magic of light and music – the main project of the 5th Klaipėda Lights Festival – the “Heart” is presented by the Italian company “MarianoLight”.

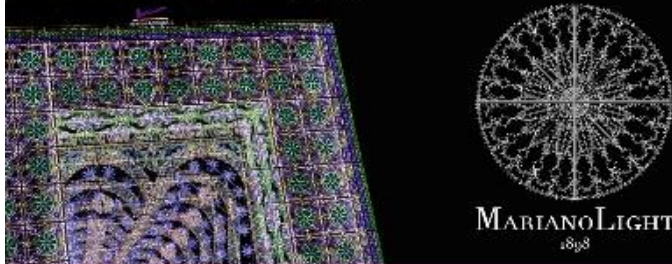

A year ago spectators of the festival were stunned by the “Gates of the Century” project by “MarianoLight”, which subtly conveys the charm of Italian culture, that leaves no indifferent. A majestic illusion that, thanks to RGB lights and special softwares, creates mesmerizing light effects and offers dazzling animations to the rhythm of famous Lithuanian songs and classics.

The project is the result of playing with the ‘forms’ of the *Luminarie* and starts from the idea of ‘solving’ one of the great problems dating back to the origins of geometry: the squaring of the circle.

“MarianoLight” is proud to present its solution to the problem – “Heart”, or the love for what we do and the emotions we arouse in the viewers of our *Luminarie*.

“MarianoLight” is one of the Italian companies, which from its established in 1898 is led by Mariano family. *Luminarie* is a one-hundred-years old tradition of street lighting, to which “MarianoLight” takes an innovative approach. “MarianoLight” has been awarded a special sign of the Italian Chamber of Commerce for its contribution to the custody of Italy and the preservation of its traditions.

Author of the project – „MarianoLight” (Italy)

Géraud Périole (FR) creates lighting for historic buildings, monuments and public spaces. He owes his technical knowledge to his engineering training. He likes to combine technical innovations with artistic and poetic expressions.

HILL OF LIGHTNING LEGENDS

Hill of Witches, Juodkrantė

Neringa, the sister of Klaipėda, is full of legends and incredible stories. It will invite to take our thoughts and gazes to the magical place – the Hill of Witches.

The traveling lights of Klaipėda Lights Festival will reveal mythological beings living in Juodkrantė. During the festival, the legends will be told by devils and witches, and the forgotten history of this place will be revealed by the spirits of the past. Because only they remember that this place was called the Mountain of Ieva, renown for one of the Europe's most beautiful paths and panoramic views.

Forty years have passed since the first wooden sculptures appeared on the Hill of Witches, which are attended by travellers from all over the world today. The idea of the exposition was then inspired by the ambition to revive the atmosphere of the forest park with walkways, which was important in shaping Juodkrantė resort in the second half of the 19th century.

Each character on the Hill of Witches tells its own fantastic story – the legend that will be illuminated by the students of the Vilnius Arts Academy Telšiai Faculty. And Finnish artist Aleksander Reichstein will bring his installation of illuminated sculptures „They were here” to the Hill of Witches, which will symbolize the wanderers who travelled here in the 19th century. According to the artist, people never really disappear without a trace – they stay as long as their image remains in our memory. The characters made of wire and covered with fluorescent paint, become living ghosts.

Initiator of the project – PE „Klaipėda Festivals” and Neringa city municipality / organizers – B1 “Neringa Museums” / authors – Telšiai Faculty of Vilnius Arts Academy and Alexander Reichstein (Finland)
